**Subject:** Re: [EXTERNAL] Fwd: Concerns Regarding Davisburg Property

Good afternoon Katie,

Thank you for the outreach regarding the proposed gravel mining operation in the township, certainly sorry to hear things didn't work out with the sale of your home.

As a little related background, I am an appointed member of the Township's Zoning Board of Appeals (ZBA), which primarily functions to handle zoning items needing a variance or interpretation of our existing zoning ordinances. In this scenario, surrounding the approval and operations of gravel mining, permitting will flow through Springfield Township's appointed Planning Commission and then the elected Township Board. This is considered a "special land use" and doesn't have ZBA involvement.

As you likely know the Planning Commission has met to discuss the proposed mining operation and there was a large amount of community engagement - a video of the hearing is [here](#). Additionally, upcoming meetings and additional information on other and future meetings can be found online here: [Meeting Agendas & Minutes](#) and [Notices](#).

The Township Supervisor is active on this issue and I'd also suggest keeping an eye on the [Supervisor's updates](#) online too; there is a recent post there that has some details regarding the efforts with legal counsel and the process.

Happy to discuss further if needed, please don't hesitate to give me a call if you need anything - my cell is below.

Regards,

Mike

**Caution:** This email originated from outside of Springfield Township's email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello,

I'm Katie Massa-Moore and I'm a resident of the Davisburg Community. I live in the Country Lane Estates subdivision off Scott Rd which has close proximity to the potential Levy Gravel Pit.

**I'm writing to express my concern and to ask that the township does not allow the gravel pit to stand.** We listed our house on July 21st, 2025 and got 2 offers within 4 days. We were under contract with a potential buyer (family with 4 kids), but a week later they pulled out because of the health, environmental, and property value impacts the gravel pit could have on the house. Since they removed their offer, we have had no offers and growing concern regarding the gravel pit, proving just the potential of the gravel pit is ALREADY impacting property values and the lives of those in the community.

As a servant to the community please take into account the community wants, needs, and concerns. Our fears are not a figment of our imagination, they are rooted in reality and research. If there is proof or research done by the community to dispel these fears and impacts of the gravel pit, please be transparent and educate the community and township.

We received the below email from the buyer that pulled out of the sale of our house, citing the many effects of the gravel pit as their reason for backing out. Please take a look - any response or address to the communities many concerns would be greatly appreciated

Thank you for your time,  
Katie

Subject: Concerns Regarding Davisburg Property

To: Erica West <[ericawest@kw.com](mailto:ericawest@kw.com)>

Hi Erica,

Thank you again for all of your time and support throughout this process. We truly appreciate the effort you've made on our behalf.

After conducting further due diligence and research, we've come to a very difficult conclusion regarding the home in Davisburg. This decision is not one we've taken lightly, especially because we absolutely loved the property.

The setting was peaceful and beautiful, and the home itself had so many things we were excited about. We were drawn to the warmth of the hardwood floors, the spacious and well-designed kitchen, the cozy wood-burning fireplace, and the inviting wrap-around porch. The home had the right amount of space and rooms to comfortably grow into, and the property as a whole felt like a place where we could truly see ourselves living and building a life.

Unfortunately, despite how much we loved it, we've developed serious concerns related to the proposed gravel pit on the west side of Ormond Road — concerns that we simply cannot overlook.

Specifically, we are deeply concerned about:

- Wells going dry: In Ann Arbor Township, nearby gravel operations have reportedly caused at least 10 residential wells to dry up, and several others have experienced significant drops in water levels — sometimes requiring homeowners to drill deeper wells or drastically lower their pumps ([michiganpublic.org](http://michiganpublic.org)).
- Silica dust in the air: Experts warn that silica dust stirred up by gravel mining can behave like asbestos, posing serious respiratory and long-term health risks to nearby residents ([radio.wcmu.org](http://radio.wcmu.org)).
- Contamination of groundwater: Public reporting indicates sediment runoff, disrupted wetlands, and potential degradation of water quality in groundwater and surrounding ecosystems ([helpsaveourwells.com](http://helpsaveourwells.com), [wemu.org](http://wemu.org), [michiganpublic.org](http://michiganpublic.org)).

We're also very concerned about increased noise levels, the presence of gravel haulers and heavy truck traffic, and how all of this could impact the property's long-term resale value.

As much as we felt drawn to the house and property, these environmental, health, and investment-related risks ultimately make it so that we cannot move forward. With that, we've made the difficult decision to step away from the purchase.

We truly appreciate your understanding, and we're sincerely grateful for all of your guidance and support throughout this process.

Thanks,

Josh

**Subject:** RE: [EXTERNAL] Follow-Up on GLELC Document

Mr. Todd:

The omission from the website was simply an oversight and certainly not intentional or nefarious. The document in question was submitted as a Public Comment for the Planning Commission public hearing and was provided to the Planning Commission as part of the official public hearing record.

We treated all public comments—both in support of and in opposition to the matter—in the same manner. Due to the volume of submissions, we did not post all written public comments on the website.

**Caution:** This email originated from outside of Springfield Township's email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Miller,

I hope you're doing well.

On behalf of the Springfield Township Environmental Protectors (STEP), I wanted to follow up regarding the **document submitted to the township board by the Great Lakes Environmental Law Center on June 24**, concerning the proposed Edward C. Levy gravel mine.

In the spirit of transparency and public awareness, we are curious as to why that document had not been posted on the township website alongside other public information. We believe it would be helpful for residents who are seeking a broader understanding of the legal and environmental perspectives surrounding this proposal.

We understand your office handles a wide range of responsibilities, and we truly appreciate the work you do to keep the public informed. Our intent is simply to stay engaged and supportive of open communication on matters that affect the community.

Thank you again for your time and consideration.

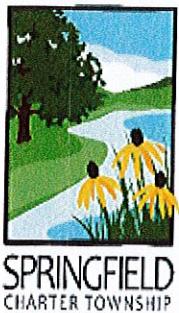

Warm regards,  
**Chris Todd**

**Caution:** This email originated from outside of Springfield Township's email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Understood. This question is still relevant to the FOIA requests:

- What time frame is "current" and "searchable" for our township when it comes to fulfilling FOIA requests?

Thanks, Sean.

Ann

On Jul 30, 2025, at 1:01 PM, Sean Miller <[smiller@springfield-twp.us](mailto:smiller@springfield-twp.us)> wrote:

Ann:

I want to clarify that I have not denied, nor did I say that I intend to deny your FOIA request. My question was simply whether there's something specific you're looking for that could help narrow the scope and make this more manageable.

As you can imagine, reviewing 11 years' worth of emails is a substantial task. When I say the emails are not "searchable," I mean that I cannot search them by keyword or recipient email address, which would otherwise help expedite the process. While I can search currently active email accounts, fulfilling your request properly will require reviewing archived emails from former Supervisors Walls and Moreau, which are not keyword searchable.

**Caution:** This email originated from outside of Springfield Township's email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Clerk Miller:

Thank you for the prompt updates to my FOIA requests dated July 28, 2025 (see below). While I certainly understand the need to extend the time frame for a response, I'd appreciate clarification of the details you provided in your voicemail message on July 29, 2025. If I understand your message correctly, it will be a "monumental undertaking" to fulfill the FOIA requests due to the fact that certain archived township records are "not searchable" because they are not "current."

I would be appreciative if you would confirm the following:

- Is my understanding of your voicemail message correct?
- How does the township expect to fulfill FOIA requests for data/information if township records are not searchable or easily accessible? I do not believe that FOIA law allows the denial of a request due to the difficulty or labor involved.
- What time frame is "current" and "searchable" for our township when it comes to fulfilling FOIA requests?

Thank you for your clarification. Once I receive your responses to these questions (via email reply), I can determine next steps. Until then, please assume that the original FOIA requests remain in effect.

Have a great day, Sean.

**Update for FOIA Requests #3 and #4**

Clerk Miller:

Good morning, Sean. Thank you for your help in clarifying and fulfilling my July 28, 2025 FOIA requests. As you have indicated, records of communication are “archived” and not “key word/email address searchable” for Township officials, employees, agents or contractors who are no longer actively employed. Based on this feedback regarding FOIA requests #3 and #4 (see below), I offer the following modification for consideration:

- To fulfill the FOIA requests as indicated for Township employees, agents or contractors who are no longer active, please provide all of these archived records in whole, in their original format, and without password protection. I will provide the storage device to accommodate receipt of this archived information.
- For any current Township official, employee, agent or contractor, please honor the terms of the original FOIA requests for all non-archived communication.

I look forward to hearing back from you. Thanks again for your support in this matter.

Have a good day.

Ann

**FOR IMMEDIATE RELEASE**

**July 19, 2025**

## **Springfield Charter Township Supervisor Ric Davis Announces Thorough Review of Gravel Mining Proposal**

### **Focus on Protecting People, Air, Water, and Land Through Expert Evaluation**

**Springfield Charter Township, MI** – In response to growing public interest and community concerns, Springfield Charter Township Supervisor Ric Davis has announced the Township's formal review process of a proposed gravel mining special land use application. The Township will retain a team of independent experts to evaluate the potential impacts of the project, with a focus on protecting the health and well-being of residents and preserving Springfield's natural environment.

“Springfield Charter Township is committed to protecting our people, our air, our water, and our land,” said Supervisor Davis. “I’ve heard from many residents, and I understand the wide range of concerns, from groundwater safety to quality of life issues like traffic, noise, property values and dust. This process will be guided by facts, not assumptions, and we will take every necessary step to make sure we get this right.”

The Township will engage professionals with expertise in hydrology, geology, and environmental science to analyze data submitted by the applicant and determine if additional testing is required. Areas of focus will include the presence of glacial esker formations, groundwater movement, well water quality, and the completeness of the application’s scientific data.

Key questions to be addressed include:

1. Are there esker formations in or around the proposed mining site, and how do they interact with the local groundwater system?
2. Could mining operations affect groundwater movement or levels, and if so, to what extent?
3. What impact, if any, might there be on nearby wells or water quality?
4. Does the data submitted provide a complete picture, or are there areas where further testing or analysis is needed?
5. If any risks are identified, what specific actions would be required to manage them?

Supervisor Davis emphasized that this is only the first phase of a larger review.

“While this first stage focuses on our water systems and geological features, we’re also preparing to evaluate other serious concerns raised by residents, including increased truck traffic, dust, noise, and potential environmental disruption,” Davis added. “All of these issues will be addressed, and nothing will be overlooked.”

Residents are encouraged to remain engaged and to bring forward questions that align with the Township's investigation. The Supervisor's Office welcomes community input and will continue providing updates as the review process advances.

## SPRINGFIELD TOWNSHIP SUPERVISOR Memorandum

**To:** Springfield Township Committee and Planning Commission  
**From:** Ric Davis, Township Supervisor  
**Date:** August 26, 2025  
**Subject:** Plan of Direction for Review of Levy Application

### Purpose

This memorandum sets forth the official direction for evaluating the Levy Company application under Public Act 113. The goal is to ensure that this process is conducted with fairness, transparency, fiscal responsibility, and a commitment to the best interests of Springfield Township.

### 1. Leadership and Responsibility

As Township Supervisor, I am responsible for leading this process, keeping it disciplined, and ensuring transparency to our community. Public Act 113 limits what municipalities can do. We cannot deny an application based on speculation, only on proven fact. Denials rooted in evidence have been upheld in case law, but actions based on assumption risk reversal in court and the loss of local control of ordinances.

### 2. Fairness and Integrity

Our responsibility is not to pursue denial or approval as an outcome in itself but to pursue truth, build a fact-based record, and reach a defensible decision. Any appearance of bias or predetermined intent undermines our credibility. Springfield deserves a process that is honest, fair, and rooted in integrity.

### 3. Unity of Message

We must present a united message that demonstrates discipline and respect for the process. Calls to “just say no” disregard the legal framework we must operate under and weaken our case. Unity of purpose and message is critical to protecting Springfield’s authority.

## **4. Resident Input and Trust**

Resident input is essential but carries responsibility. Contributions must foster trust and unity rather than fear or division. We must protect residents from fearmongering and reassure them that this process will be handled correctly. While there is no guarantee we will achieve the exact outcome some desire, if we fail to conduct this process properly, the risks to our community—legally, financially, and environmentally—will be greater than necessary.

## **5. Environmental Concerns**

My primary concern is Springfield's unique natural environment, including prairie fens, interconnected water systems, and habitats of state and federally protected species. These ecosystems are among Michigan's rarest and most sensitive. We must rely on environmental assessments, DNR reports, and other authoritative sources to evaluate potential impacts, including:

- Effects on prairie fen wetlands and biodiversity
- Disruptions to groundwater flow and water systems
- Risks to habitats of threatened or protected species

Protecting these resources is both a legal obligation and a moral responsibility to future generations.

## **6. Dispelling Misinformation**

This process must remain fact driven. Political agendas, personal emotions, and speculation have no place here. Several narratives require clarification:

- This is a gravel mine application, not a rock quarry. Gravel and sand are loose material. Blasting does not occur in gravel and sand mining.
- Concerns about silica dust must be understood in context. Uncontrolled exposure poses risks, but gravel mining can be regulated with proven mitigation protocols such as wet extraction methods. These controls are enforceable and designed to prevent exposure.

Our record must be built on facts, not assumptions or fear.

## **7. Escrow and Fiscal Responsibility**

Through negotiation with the Levy Company, escrow accounts have been established to fund reviews by larger consulting firms. Escrow funds cannot be used for Township special counsel, small independent consultants, or additional testing. Any testing costs will be borne by the Township.

Township experts must guide us to what additional testing is essential. Escrow should cover broad consulting reviews, while Township resources are safeguarded by careful cost control.

## **8. Committee and Consultant Roles**

The committee and its consultants must produce a disciplined, fact-based, and impartial work product that enables the Planning Commission to deliberate, ask questions, and request clarification. The Planning Commission's recommendation to the Board must reflect sound investigation, not speculation.

## **9. Strategic Use of the Negotiated Pause**

The pause negotiated with the Levy Company is an advantage. It prevents rushed decision-making and gives us the time needed to collect evidence and strengthen our record. This opportunity must be used productively and not wasted on distraction.

### **Closing Statement**

This process is about responsible governance. My role is to lead, provide transparency, and ensure a disciplined approach. We must remain united, rooted in fact, and committed to protecting Springfield's future.

Resident voices are vital, but they must strengthen trust rather than feed fear. My priority remains protecting Springfield's prairie fens, water systems, and protected species. While no outcome can be guaranteed, I can guarantee that if we fail to do this correctly, the risks will be far greater.

Thank you all for participating. Please speak openly if you believe I have missed something. My responsibility is to lead and guide this process, not to push an incomplete narrative. Together, with legal expertise, environmental knowledge, transparency, and commitment, we have an opportunity to do this right and deliver results we can all be proud of.

**Respectfully,**

Ric Davis, Supervisor  
Springfield Charter Township

---

**From:** Ric Davis  
**Sent:** Tuesday, August 26, 2025 12:55 PM  
**To:** Township Board; Planning Commission  
**Cc:** Greg Need; fisherg@cooley.edu  
**Subject:** Coordination Meeting and Initial Vetting for Planning Commission Preparation  
**Attachments:** SPRINGFIELD TOWNSHIP SUPERVISOR Resident committee meeting 8 26 25.docx

All:

Today, I will be meeting with the following individuals as part of the preliminary vetting process designed to support and prepare the Planning Commission for the responsibilities ahead:

- Brian Omara and Mike Wilcynski – *Agate Harbor Advisors, LLC, Grosse Pointe Farms, MI*  
Over a month ago, Jerry Fisher, Greg Need, and I conducted an initial interview with Mr. Omara. Following that conversation, we agreed that he brings a strong set of credentials and a solid knowledge base that could prove invaluable to this process.
- Cris Todd – A resident of Ormond Road near the proposed project site. Mr. Todd has consistently demonstrated a measured, fact-based approach, a sound understanding of the procedural framework, and a thoughtful awareness of potential community impacts.
- Kara Okonewski – Previously addressed the Planning Commission with well-researched concerns regarding hydrogeological impacts. Ms. Okonewski brings a high level of subject-matter understanding and has offered valuable insight that aligns with broader community concerns. She has demonstrated that she understands the process that we must follow.
- Jerry Fisher – Special Counsel, providing legal guidance throughout this process.

The purpose of this meeting is to initiate a structured and transparent review process, ensuring the Planning Commission is adequately informed and equipped to evaluate the matter before them. An outline of the meeting objectives has been included for reference and discussion.

I have also included the résumé of Mike Wilcynski for your review, as it may provide additional context relevant to today's discussion.

Your input is not only encouraged, but also essential. We are committed to a process marked by transparency, professional integrity, and a shared responsibility to act in the best interest of the Township. I look forward to today's discussion and the collective progress ahead and will continue to keep the board and commission informed.

Sincerely,  
Ric Davis, Supervisor

Springfield Charter Township

Dear Supervisor Davis,

Great Lakes Environmental Law Center (GLEC), an environmental advocacy organization, stated their opposition to Levy's proposed Springfield Township mine. In so doing, GLEC raised concerns about alleged environmental violations received by the Edw. C. Levy Co. (Levy) and its subsidiaries.

Thank you for giving us time to carefully review GLEC's claims. GLEC made many claims in their letter, and we needed sufficient time to research each allegation, understand the truth, and provide a thoughtful response. Levy takes all regulations and violations seriously as we pride ourselves on being good stewards of the environment. When violations occur, Levy works quickly to remedy them.

Of the 100 alleged violations, 96 involved businesses unrelated to sand and gravel mining. Since Levy is seeking a sand and gravel mining permit in Springfield Township, our response focuses on the 4 citations tied to that industry. We understand the community's interest in learning more about sand and gravel mining and its potential risks, so this letter details the 4 related citations Levy has received in Michigan over the past 20 years.

The violations raised by GLEC:

1. Were over a 20-year period, notwithstanding frequent inspections
2. Four were issued to sand and gravel mining operations, and are detailed below
3. None of the four violations created or had the potential to create "Very Serious Consequences"

Site	Date of Violation	Violation	Violation Description	Comments/Status
American Aggregates - Buno Plant	4/10/2017	NPDES - Poor Housekeeping	Several minor housekeeping issues noted during an EGLE storm water inspection on 4/10/2017.	Compliance Communication 4/13/2017. Very minor housekeeping concerns corrected immediately. Status - Closed.
American Aggregates - Buno Plant	5/19/2017	NPDES - Compliance Schedule Not Received by Due Date - (Due: 05/15/2017)	Late submittal of response to EGLE's 4/13/2017 Compliance Communication.	Violation Notice - 5-19-2017. Disputed. Levy's response was submitted on 5/12/2017 by mail and email, prior to the due date of 5/15/2017. Status - Closed.
American Aggregates - Grange Hall Road	4/26/2022	GROUNDWATER - Failure to Properly Maintain All Treatment, Control Facilities and/or Systems	NO VIOLATION CITED	Compliance Communication 9/14/2023. No violation cited. Status - Closed.
American Aggregates - Ray Road	12/13/2011	NPDES - WRD - NPDES	Unpermitted discharge of lake water to the adjacent wetland to the north.	Violation Notice - 12-13-2011. Levy immediately removed the culvert to eliminate the discharge of lake water. Status - Closed.

We hope this explanation conveys Levy's desire and ability to comply with environmental requirements. As illustrated above, all citations were resolved, there is no history of recurrence, and we are pleased to have maintained our environmental record over the past 20 years. Please let us know if you have any questions or desire further information.

Sincerely,

Reuben Maxbauer
