****OFFICIAL STATEMENT****

Springfield Township Supervisor, Ric Davis, has abruptly <u>postponed</u> the first 'Fact Finding Meeting' with no reschedule date.

The first **'Fact Finding Meeting'** between the Springfield Township citizen representatives and township officials was scheduled for July 29th, 2025, with the goal of open, collaborative discussion about the proposed Levy Mine on Ormond Road. The meeting, which was Ric's own proposal to promote transparency, was suddenly 'postponed' only 24 hours before the meeting was expected to take place. This delay comes amid growing frustrations that a June 24th letter from the Great Lakes Environmental Law Center, submitted as a public comment, still has not been made publicly available by the township as of July 29th. Despite reassurances of transparency and public access to information, S.T.E.P. is alarmed that citizens are not receiving key documents or timely updates. <u>This is obstructing Springfield Township citizens ability to defend their interests and hold decision-makers accountable for matters that directly impact their health, environment, economic well-being, and quality of life.</u>
